# capabilities

**Viking Electric Supply** offers you the complete lighting solution for your project. Whether you are looking at replacing a few lamps or designing the indoor and outdoor lighting for a new building, Viking Electric Supply will be there to make sure you get the best value for your lighting dollar. Our industry leading suppliers, partnered with our experienced project team, will help you select the correct solution to satisfy your energy and safety concerns.

## Lighting Design

Our experienced project team will help you design a lighting solution and support the design with industry leading software and tools such as AGI and AutoCAD. We can provide light level documentation as well as energy consumption estimates for your documentation.

## Lighting Audits

Viking Electric Supply will work with you and your utility representative to offer the most efficient solution for your requirements. We strive to offer an energy efficient lighting upgrade supported by the highest utility rebate available.

## Lighting Retrofit

Viking Electric partners with quality manufacturers providing products that meet your performance specifications with warranty support. Working with Viking ensures that the products selected will perform to your expectations now and in the future.

## Control

Realizing that energy efficient, quality lighting leads to savings, Viking Electric offers expertise in occupancy and daylight harvesting control to complete the equation. Our product recommendations are supported by application experience and documentation, which assures you maximum savings.

## Programming & Commissioning

Philips Color Kinetics is recognized as an industry leader in both white and color-changing LED fixtures. Viking Electric can help turn your project into reality by assisting you with product selection, application, programming and start-up. We continue to support your installation after the sale to ensure you are satisfied with your purchase.

# project support

## Project Management

When you place your order with Viking Electric, a dedicated Project Manager is assigned to support you during all phases of your project. Our Project Managers are here to provide timely and accurate information. Our goal is to take the surprise factor out of the equation.

We're here to support you with the following services:

- Manage submittals and approvals from start to finish, highlighting requirements and key concerns prior to the release of orders.
- Constantly monitor the project's expected delivery date and billing, communicating relevant information in a timely fashion.
- Proactively resolve issues that impact job site productivity. This ensures that product is delivered on-time and meets your expectations.

## Inventory Management

When space at your job site is at a minimum or specific daily delivery is critical to your construction schedule, Viking Electric has a solution.

Using our Project Inventory Management program, your complete bill of materials, from all factories, is delivered to our Distribution Center.

- Your product is stored in our secured warehouse until you need it. We will make specific deliveries to your job site using Viking trucks, based on your daily needs.
- Project inventory levels and tracking of shipments are available as needed for the duration of your project.
- All deliveries are sorted and clearly marked for ease of identification on your job site.
